Experience

Microsoft

Azure IoT Technology Specialist (May 2021 – Present)

- As a cloud solution specialist, I help architect IoT solutions centered around our Azure cloud services. I establish relationships with our partners and customers, while working closely with them to architect IoT solutions.
- PM technical projects to completion. Manage milestones, bring in necessary SME's, manage workflows. and help to remove technical blockers.
- Collaborate heavily between partners, product groups, engineering, and other Microsoft field groups. Helping grow Azure IoT and to further enhance solutions and service offerings.
- Managed IoT Academy training program that had over 250 virtual attendees. Planned, facilitated, and managed live hands on IoT training, created demos and technical deep dives for our partners and customers on Azure IoT.

Business Programs and Operations Support IoT – Exec Admin (2019 – 2021)

- Managed multiple projects utilizing resources, managing tasks, and project timeline with IoT Executive Leadership.
- Marketed and helped lead and drive Give campaign which increased participation for our event from 51% to 81.1%.
- Project management and marketing for various technical IoT events including technical training summits, marketing and technical conferences which included all milestones leading up to event.
- Technical support for team hardware issues. Assist with special hardware purchases which included advice on technical related purchases and hardware setup.
- Proactively managed leadership team ROB, making decisions on their behalf based on shifting business priorities to ensure accurate scheduling and appropriate allocation of time.

Business & Executive Admin (2008 – 2019)

- Proactively managed executive schedule
- Event management for team and executive
- Facilitated training and onboarding all new hires
- Tech hardware support for team
- Space management
